

THE STAR OF ENERGY SAVINGS

THERMACOAT™

SOLAR REFLECTIVE COLORS

Available Only On Anlin Windows And Patio Doors

COLOR THAT CHANGES ... EVERYTHING

Designers know that color is one of the most effective ways to enhance a home's charm and curb appeal. It's the finishing accent that turns a nice home into a "wow" home. Available in 12 of the most popular designer colors, ThermaCoat lets you personalize your Anlin windows and doors to bring out the best in your home. And with ThermaCoat, beauty is just the beginning. Unlike ordinary paints that absorb the sun's infrared heat, ThermaCoat Solar Reflective Colors are made with pigments that reflect the sun's infrared heat, keeping your vinyl windows and doors cooler regardless of color. When you consider that Anlin windows and doors already lead the industry in thermal performance, adding ThermaCoat is the perfect complement.

ThermaCoat™ colors ...

- ... are the most environmental friendly coatings in the industry.
- ... exceed California environmental standards by as much as 80%
- ... are rated as non-hazardous by the EPA.
- ... exceed AAMA and ASTM standards for heat reflectivity, UV resistance, humidity and corrosion resistance, impact and adhesion.

ANLIN'S COMMITMENT TO QUALITY

Our Technology

Anlin Windows and Doors is the leader in solar reflective coating technology. Our state-of-the-art coatings facility is computer-controlled to maintain ideal conditions for application and drying. Our process combines the quality standards of the automotive industry, heat diffusion technology used in the US Military Stealth Program and proprietary components that bond our coatings to vinyl at the molecular level. ThermaCoat Solar Reflective Colors are so durable they're covered by Anlin's benchmark Full Lifetime Warranty.

Our Team

Anlin's ThermaCoat team is made up of experienced and dedicated coatings application specialists. They take pride in their craft, because they know they are helping you take pride in your home.

THERMACOAT™

SOLAR REFLECTIVE COLORS

ThermaCoat™ solar reflective colors use the same technology that originated within the US Military. Currently these reflective pigments are used in the military Stealth Program to diffuse heat and eliminate radar detection of aircraft. It's just one more way Anlin Windows and Doors uses better technology and design to enhance your home's beauty and energy efficiency.
